

### **About Nick**

I am first and foremost a husband and father. I have been married to my lovely wife, Katerina for almost 17 years. We have three daughters. We run the family business together, and have for almost a decade.

I have spent the last four years working with the ACC to remedy decades of water issues for my community. I understand first hand the trials and tribulations of dealing with the Commission from a ratepayer viewpoint. This experience places me in a unique position to fight for people like you, the customers of the utilities.

Some of my accomplishments at the Commission include:

- Restoring water service to a local community that had their water removed arbitrarily and capriciously by the local utility.
- Helping a customer who was discriminated against by a utility with her formal complaint, and ultimate settlement with the utility.
- I was pivotal in the groundbreaking effort within the state of Arizona that culminated in getting an interim manager installed into a Class A utility that had been abusing customers and ratepayer money for over 20 years.
- Ongoing battles with a utility in an effort to get the utility to uphold it's openly stated commitments to customers.

### **Why I'm Running**

For decades Arizonans have dealt with a Corporation Commission that has neglected the people. Corporations have done whatever they want and been able to get away with it. Arizonans need someone that is willing to stand up for them now, and in the future. Someone who will look out for their best interests proactively instead of reactively.

Many Arizona utility customers, just like you, end up paying more than they should, having disconnection issues, and sometimes are even the victims of abusive practices by utilities. All of these are problems that I can, have, and are continuing to address. For 4 years I have been a customer, just like you, that has dealt with unfair and unjust utility issues. Fighting empty promises, discrimination, neglect from the Corporation Commission staff, irresponsible rate setting, corruption, and refusal of service from a utility. All things that I can and will address as a Commissioner.

It's time to put aside the current atmosphere of partisan game playing, and start focusing on the issues that really matter for Arizona's future. Let's stop this trend of neglect and overlook, and elect someone with the experience needed to serve you, the wonderful people of Arizona.
